

北北基高級中等學校

113 學年度學科能力測驗聯合模擬考試

英文考科

請於考試開始鈴響起，在答題卷簽名欄位以正楷簽全名

—作答注意事項—

考試範圍：第 1～5 冊

考試時間：100 分鐘

作答方式：

- 選擇題用 2B 鉛筆在「答題卷」上作答；更正時以橡皮擦擦拭，切勿使用修正帶（液）。
- 除題目另有規定外，非選擇題用筆尖較粗之黑色墨水的筆在「答題卷」上作答；更正時，可以使用修正帶（液）。
- 考生須依上述規定劃記或作答，若未依規定而導致答案難以辨識或評閱時，恐將影響成績。
- 答題卷每人一張，不得要求增補。

選擇題計分方式：

- 單選題：每題有 n 個選項，其中只有一個是正確或最適當的選項。各題答對者，得該題的分數；答錯、未作答或劃記多於一個選項者，該題以零分計算。
- 多選題：每題有 n 個選項，其中至少有一個是正確的選項。各題之選項獨立判定，所有選項均答對者，得該題全部的分數；答錯 k 個選項者，得該題 $\frac{n-2k}{n}$ 的分數；但得分低於零分或所有選項均未作答者，該題以零分計算。

祝考試順利

第壹部分、選擇題（占 62 分）

一、詞彙題（占 10 分）

說明：第 1. 題至第 10. 題為單選題，每題 1 分。

1. The teacher's strict look was enough to _____ the misbehaving students into silence.
(A) intimidate (B) persuade (C) encourage (D) console
2. According to the news, an _____ 300 Taiwanese victims have been tricked into working for job scams in Cambodia this year.
(A) enormous (B) estimated (C) ethical (D) enlightening
3. The community showed great _____ for the victims of the natural disaster by organizing relief efforts and donations.
(A) sympathy (B) indifference (C) endurance (D) hostility
4. Due to unexpected _____, the train was delayed for over an hour, causing inconvenience to the passengers and disrupting their travel plans.
(A) endeavors (B) accumulations (C) circumstances (D) rehearsals
5. The college graduate decided to _____ her application from the job position after receiving a better offer from another company.
(A) revise (B) obtain (C) propose (D) withdraw
6. Adam was thrilled to find a(n) _____ antique watch at the flea market, carefully crafted with delicate details.
(A) accurate (B) authentic (C) relevant (D) comparative
7. As Jane talked about her promising new project with strong passion, Jeremy couldn't help but notice the _____ in her eyes.
(A) despair (B) contempt (C) outrage (D) sparkle
8. The team achieved _____ success in the competition, thanks to their strategic planning and great teamwork, which allowed them to win the championship.
(A) intensive (B) partial (C) tremendous (D) vigorous
9. Regular exercise and a balanced diet can help _____ excess weight and improve overall health.
(A) accomplish (B) eliminate (C) acquire (D) explode
10. Speeding and driving _____, the man should undoubtedly take full responsibility for the severe car accident.
(A) recklessly (B) cautiously (C) dominantly (D) spontaneously

二、綜合測驗（占 10 分）

說明：第11.題至第20.題為單選題，每題 1 分。

第 11. 至 15. 題為題組

As Christmas is around the corner, you may hear a lot of Christmas songs, including some classics and the album, *Everyday is Christmas*. This is the eighth studio album and the first Christmas album by the Australian singer-songwriter Sia, who often wears a wig that hides her face to protect her privacy.

Everyday is Christmas features Christmas songs, released with ten tracks in 2017 11. . Then it was reissued in 2018, 2021, 2022 with extra tracks added each time. You may 12. “*Santa’s Coming for Us*,” “*Snowman*” and “*Candy Cane Lane*,” to name a few.

13. for being changeable and inconsistent, the album is compared to “opening a gift where someone has forgotten to remove the tags.” Besides, some describe the album as “vaguely festive.” However, ABC News praises the record, 14. Sia for designing the album for those who are turned off by the so-called holiday classics.

Sia’s voice is considered deep, playful and powerful; some critics even comment that her throaty, slurred vocals can deal with melancholy and obsession. Due to her artistry, she has been nominated for the Grammy Award nine times, and 15. the MTV Video Music Award in 2014. She is by all means a distinct singer-songwriter.

|---------------------------|--------------------|----------------------|----------------------|
| 11. (A) finally | (B) roughly | (C) undoubtedly | (D) initially |
| 12. (A) get accustomed to | (B) get along with | (C) be familiar with | (D) be suspicious of |
| 13. (A) Criticize | (B) Criticizing | (C) Criticized | (D) To be criticized |
| 14. (A) complimenting | (B) upgrading | (C) facilitating | (D) discouraging |
| 15. (A) was to win | (B) won | (C) winning | (D) should win |

第 16. 至 20. 題為題組

The legal status of virtual currencies differs from country to country and is still not defined in many countries. While some countries have allowed their use and trade, others have restricted or 16. them. There are good reasons why they don’t circulate universally. For one thing, these currencies receive 17. , including lack of stability in their price, high and dynamic transaction costs, poor security and fraud at exchanges, etc. Apart from these problems, mining virtual currencies requires an enormous amount of electricity, 18. a large carbon footprint, which sparks off greenhouse gas emissions.

For another, virtual currencies, such as Bitcoin, are not reliant on any central authority like a government or bank. 19. , they are designed to function as a means of exchange via computer networks. When a virtual currency is created prior to its issuance, it is generally considered decentralized. Implemented with decentralized control, these currencies utilize the blockchain technology to serve as a public financial transaction database. In this way, virtual currencies can be seen as a form of revolutionary innovation, as they 20. and function independently of traditional central authorities. In a word, the legality and impacts of virtual currencies are still controversial around the world.

|--------------------------|----------------------|-------------------------|--------------------------|
| 16. (A) proclaimed | (B) prohibited | (C) promoted | (D) projected |
| 17. (A) prompt treatment | (B) practical advice | (C) constant temptation | (D) widespread criticism |
| 18. (A) resulting in | (B) resorting to | (C) deriving from | (D) setting off |
| 19. (A) Moreover | (B) Accordingly | (C) Otherwise | (D) Instead |
| 20. (A) vibrate | (B) cooperate | (C) operate | (D) elaborate |

三、文意選填（占 10 分）

說明：第21.題至第30.題為單選題，每題 1 分。

第 21. 至 30. 題為題組

Scams are getting more and more sophisticated. Scammers keep up to date with things that are in the news, and use government schemes people might have heard of but aren't familiar with to create new scams. The tactics used by scammers and fraudsters can 21. from someone knocking on your door to a nuisance phone call. In recent years, the Internet and advances in digital communications have made it easier for scammers to 22. you and steal information. If you happen to find yourself in the following situations, you may have already 23. the most common types of scams. One of them is spam emails pretending to be from your bank. Another is texts claiming that 24. is required for a package to be delivered. As for the "mum and dad" scam, scammers using WhatsApp pose as family members in order to 25. victims into transferring money.

Knowing what to 26. when it comes to scams is one of the best ways to protect yourself. Here are some tips. Do not open emails from people you don't know or click on any links in an email or a message unless you are sure it is safe. Scammers often use a 27. variation in spelling or logo to lure you. In addition, secure your personal information. Never give out personal information. This can be used to steal your 28. and access accounts. In particular, you should never share your full PIN or password with anyone. Speaking of passwords, use strong ones, for they are 29. to online security. Also, keep your software up to date and install software that provides antivirus, firewall, and email filter services. Finally, stay 30. of the latest cyber threats and learn how to avoid them. You can never be too careful when it comes to protecting yourself and your finances.

- | | | | | |
|--------------|------------|--------------|----------------|------------------|
| (A) informed | (B) vary | (C) payment | (D) slight | (E) come across |
| (F) identity | (G) target | (H) critical | (I) manipulate | (J) look out for |

四、篇章結構（占 8 分）

說明：第31.題至第34.題為單選題，每題 2 分。

第 31. 至 34. 題為題組

The 2024 Paris Olympics Opening Ceremony was a breathtaking event that made a significant mark on Olympic history. Athletes paraded along the Seine River on boats, which turned the entire city into a spectacular stage. The ceremony was a vibrant display of France's diverse cultural expressions and artistic inclusion, emphasizing a message of global unity.

31. On the roof of the Grand Palais, an opera singer Axelle Saint-Cirel performed "*La Marseillaise*," while near the Eiffel Tower a footbridge was transformed into a catwalk for a French fashion showcase. Another opera singer, accompanied by French heavy metal band Gojira, performed "*Ah! Ça ira*," a symbolic song of the French Revolution. 32. It not only highlighted the nation's spirit of resilience but also symbolized France's blend of classical heritage with contemporary evolution. Additionally, symbolic acts, such as a portrayal of Marie-Antoinette holding her head, creatively mixed historical narrative with modern art.

Artistic inclusion was another key theme, reflected through the performances of a diverse range of artists. 33. Lady Gaga, singing in French, added a global touch, while Aya Nakamura brought a fresh, urban energy with her dynamic performance. Celine Dion delivered a powerful rendition of Edith Piaf's "*Hymn to Love*" with the Eiffel Tower in the background. Another performance featured drag queens, dancers, and models mimicking Leonardo da Vinci's *The Last Supper*. The wide range of different styles and expressions demonstrated the event's commitment to inclusivity, celebrating a broad range of artistic talents.

Overall, the 2024 Paris Olympics Opening Ceremony was an exceptional display of cultural and artistic diversity. 34. This event not only set a positive tone for the Games but also showcased the power of art to unite people across different cultures.

- (A) A notable performance dedicated to Notre Dame's restoration team used traditional ballet alongside modern street dance.
- (B) International stars' performances enhanced the global atmosphere and reflected the multicultural nature of the Olympics.
- (C) It successfully merged traditional and modern elements, celebrating the inclusivity of French culture while embracing global artistic expressions.
- (D) There were several performances highlighting cultural diversity by honoring significant French historical events and modern influences.

五、閱讀測驗（占 24 分）

說明：第35.題至第46.題為單選題，每題 2 分。

第 35. 至 38. 題為題組

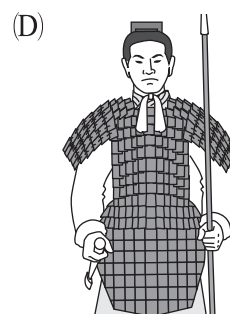

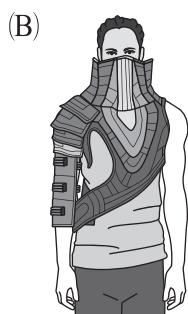

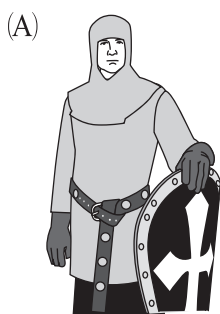

On the battlefield, soldiers not only need to be equipped with high-quality weapons but also require defensive armor to shield themselves from enemy's attack. The muscle cuirass was a type of armor in ancient times designed to fit the wearer's core part of the body and mimic an idealized male figure. Its design, imitating the human body, was inspired by the concept of heroic nude in Greek art.

Originating in late Archaic Greece, the muscle cuirass became widespread in the 5th and 4th centuries BCE. The earliest known depiction of such gear dates back to around 470-460 BCE on a sculptural warrior's upper body on the fort of Athens. Although the Greek historian, Polybius, didn't mention muscle cuirass in his description of the types of Roman armor, archaeological evidence suggests that it was worn in combats. The combat suit was made in two pieces, the front and the back, then hammered together, weighing around 25 pounds. Initially made of bronze, it was later crafted from molded leather so that the bulky outfit became much lighter for quick moves.

Muscle cuirasses are frequently portrayed in Greek and Roman art, worn by generals, emperors, and gods. Roman sculptures often feature highly decorated and delicate muscle cuirasses with mythological scenes. In contrast, simpler versions of the armor were worn by the soldiers on the battlefield, most of whom were officers or commanders. There were various types of the Roman officers' protective equipment, with decorative leather at the armholes and lower edges serving as "uniforms" to distinguish senior officers.

Unlike in ancient Greece, the muscle cuirass in the Roman Empire was a symbol of wealth and status, and its value lay in its capacity to impress. During the later stage of the Roman empire, various types of armor more suitable for combat were already widespread, but only the muscle cuirass, ornamented with fancy designs, could showcase the extraordinary status of its wearer. For example, Roman emperors in sculptures frequently wore highly **embellished** muscle cuirasses, symbolizing their mastery over the world, with elaborate decorations unique to Roman cuirasses and not found on Greek ones.

35. Which of the following pictures best illustrates the image of the muscle cuirass?

36. Which set of words is used to refer to muscle cuirass in the passage?

a. protective equipment

b. intricate designs

c. bulky outfit

d. gear

e. the armor

f. uniform

g. combat suit

h. heroic nude

(A) a, b, h

(B) d, e, g

(C) b, c, f

(D) c, e, h

37. Which of the following aspects about muscle cuirass is **NOT** discussed in the passage?
(A) Its maintenance. (B) Its development. (C) Its functions. (D) Its materials.
38. Which of the following is closest in meaning to “**embellished**” in the last paragraph?
(A) Recommended. (B) Beautified. (C) Captured. (D) Documented.

第 39. 至 42. 題為題組

“Thinking, Fast and Slow,” authored by Nobel laureate Daniel Kahneman, explores the dual processes that govern human thought: System 1 and System 2. System 1, or “fast thinking,” is automatic, intuitive, and often operates subconsciously. It allows us to make quick decisions and judgments without much deliberate thought. This system is responsible for tasks like detecting hostility in a voice, solving simple math problems, or driving a familiar route. Its operations are fast and effortless but can be prone to errors and biases. On the other hand, System 2, or “slow thinking,” is deliberate, analytical, and conscious. It is engaged when we focus on complex tasks requiring mental effort, such as solving complicated math problems, evaluating a job candidate, or comparing different investment opportunities. While more reliable, this system is slower and more labor-intensive, often requiring significant cognitive resources.

Kahneman’s book delves deeply into how these systems interact and influence our decision-making processes. He highlights numerous cognitive biases and errors stemming from overreliance on System 1, such as the availability heuristic that people judge the likelihood of events based on how easily examples come to mind, or the anchoring effect, which deals with how initial information can strongly affect our perceptions and decisions. Another significant theme in “Thinking, Fast and Slow” is the inherent flaws in human intuition. Kahneman explains that while System 1 can be highly efficient, it is also prone to systematic errors. These errors often occur because System 1 uses heuristics—mental shortcuts that simplify decision-making. While heuristics can be useful, they can also lead to predictable mistakes.

Kahneman’s insights have profound implications not only for psychology but also for economics, medicine, and public policy. By understanding the differences between fast and slow thinking, individuals and organizations can improve their decision-making processes, reduce errors, and soften the impact of cognitive biases. Ultimately, the book provides a comprehensive framework for understanding the complexities of human thought and the mechanisms that drive our judgments and decisions.

39. What is the purpose of this article?
(A) To distinguish the two thinking systems for understanding human cognition.
(B) To justify Kahneman’s insights on the fields of psychology and public policy.
(C) To claim that System 1 thinking is faster and more efficient than System 2 thinking.
(D) To introduce a book about thinking systems and their impacts on decision-making.
40. According to the passage, which of the following tasks is System 1 likely responsible for?
(A) Reading between the lines.
(B) Planning a detailed project timeline.
(C) Recognizing a familiar face in a crowd.
(D) Writing an in-depth experiment report.

41. In what way can System 2 minimize the flaws existing in human intuition?
- (A) By relying solely on detailed analysis.
 - (B) By reducing the need for cognitive effort.
 - (C) By making quick decisions under pressure.
 - (D) By consciously correcting the errors from System 1.
42. What can we infer from this passage?
- (A) System 2 should be used for all decisions due to its reliance on deliberate thought.
 - (B) The interaction between System 1 and System 2 may result in a balanced approach.
 - (C) System 1's quick and effortless nature makes it impractical for everyday decision-making.
 - (D) The efficiency of System 1 is always preferred over the accuracy of System 2.

第 43. 至 46. 題為題組

Does making food out of thin air raise your eyebrows? The world's first "air-protein," called Solein and created by the Finnish start-up Solar Foods, received approval from the Singapore Food Agency in 2022. This year, the company launched its commercial-scale Factory 01 in Finland, with plans to introduce products to the EU and US markets by 2025. Solein, a mustard-yellow powder, is a pure and nutritious protein containing all essential amino acids.

Solar Foods produces Solein using sophisticated machines powered by solar energy. The process involves feeding microbes with carbon, hydrogen, oxygen, and nitrogen extracted from the air. This bioprocess essentially resembles yogurt or wine fermentation with sugar replaced by these gases. Solein production is the first food production method entirely independent of agriculture.

Studies have pointed out that agriculture contributes to approximately 30% of greenhouse gas emissions and 70% of global water use, with negative impacts such as land degradation and waterway pollution. In contrast, Solein production requires just 10% of the land and 1% of the water needed for producing an equivalent amount of meat protein, with only 1% of the associated greenhouse gas emissions. It also eliminates the need for fertile land, animals, or photosynthetic plants, which makes it uniquely scalable. Production can occur anywhere, including harsh environments like deserts, Arctic regions, and even space.

Moreover, Solein's versatility allows it to take on various shapes and flavors. With Solein incorporated into affordable foods, we will only need one-tenth of the current agricultural land yet produce sufficient protein-rich foods to meet global demands. Consequently, Solein is increasingly seen as a solution to climate change and food scarcity. Also, its potential for space-based production could support long-term space missions, enabling more effective human exploration of the universe.

As Solar Foods pioneers this revolutionary method, other alternative proteins derived from plants, cells, or microorganisms also promise sustainable food production. Tomorrow's menu might include dairy products made from fermented milk cells, plant-based desserts enriched with milk fat, or bioreactor-produced chicken breast filets. The world is swiftly approaching a global food production transformation aimed at feeding the growing population sustainably.

43. According to the passage, which of the following statements is accurate?
- (A) Solein production uses 100 times less water and 10 times less land than animal farming.
 - (B) Solein is created by feeding microbes with gases from the air, using sugar as a nutrient.
 - (C) Solein comes in a form of mustard-yellow powder, which can only be consumed directly.
 - (D) Solar Foods plans to limit Solein production to areas with tropical climates and barren soils.
44. How does solar food production compare to agriculture?
- (A) It requires more land and water but emits less greenhouse gas.
 - (B) They both depend heavily on land conditions and water availability.
 - (C) They both require animal and photosynthetic plants to produce protein.
 - (D) It is independent of fertile land and can occur in extreme environments.
45. Where is the text most likely to be found?
- (A) In an advertisement for a new restaurant menu item.
 - (B) In a scientific research paper on farming practices.
 - (C) In a journal focused on cutting-edge food innovation.
 - (D) On a website discussing pros and cons of scientific advancement.
46. According to the passage, which of the following is an opinion, **NOT** a fact?
- (A) Tomorrow's menu might include dairy products created through advanced sustainable methods.
 - (B) The process of making Solein basically mimics traditional fermentation methods.
 - (C) Solein production is more energy-efficient than animal or plant-based food production.
 - (D) The scalability and independence from fertile land make Solein a solution for food production.

第貳部分、混合題（占 10 分）

說明：本部分共有 1 題組，每一子題配分標於題末。限在答題卷標示題號的作答區內作答，並依規定用筆作答。

第 47. 至 50. 題為題組

To communicate and debate more effectively, it is important to understand and avoid various fallacies that can block rational thinking. Among these, the appeal to authority and ad hominem fallacies are two that frequently appear in debates and discussions.

The appeal to authority fallacy occurs when an argument is deemed true or valid solely because it is backed up by an authority figure, even in the absence of strong evidence or reasoning. Regardless of the argument’s truth or the authority figure’s fame or respect, the importance of solid evidence can’t be dismissed. Expert opinions alone don’t constitute unquestionable proof, particularly if the individual cited isn’t a legitimate authority on the subject. This means the expertise of the authority or the relevance of that expertise to the point at issue are in question. For instance, a person might claim that a particular diet is the best simply because a famous celebrity approves and endorses it. This reliance on the celebrity’s status, rather than on scientific evidence or nutritional data, leads to the acceptance of claims without proper examination, discourages critical thinking, and spreads misinformation. Recognizing the appeal to authority fallacy helps encourage critical thinking and skepticism, prompting us to seek out and evaluate the actual data behind claims.	The ad hominem fallacy involves attacking the person making an argument rather than addressing the argument itself. This type of fallacy diverts attention from the substance of the debate and instead focuses on irrelevantly casting doubt on the opponent’s credibility through irrelevant personal attacks. For example, one might discredit a critic’s review of a movie by saying, “You can’t trust John’s review on this movie. Look at how poorly he dresses!” However, John’s taste in dressing is logically irrelevant to the quality of his movie review. This attack on the opponent’s personal character or actions ignores the merits of their argument and prohibits productive discussion. The ad hominem fallacy can be particularly damaging as it shifts the focus from the ideas being discussed to the individuals presenting them and prevents a fair evaluation of the arguments. By separating personal attacks from logical critique, we can ensure that discussions remain constructive and centered on the issues at hand rather than on the individuals presenting them.
---	--

47. -48. 下列簡短敘述摘記上方文章重點。請從文章中找出最適當的單詞（word）填入下列句子空格中，並視句型結構需要做適當的字形變化，使句子語意完整、語法正確，並符合全文文意。每格限填一個單詞（word）。（填充，4 分）

The appeal to authority fallacy occurs when an argument is accepted uncritically as true based on the 47. and support of an authority figure rather than on evidence, while the ad hominem fallacy involves 48. an argument by attacking the person making it.

49. From (A) to (F) below, choose the **ONES** that are true for both the appeal to authority and the ad hominem fallacies. (多選題, 4 分)

- (A) Misleading people by substituting the reputation of a figure for solid evidence.
- (B) Reminding us that even specialist views must be backed by proof and logical reasoning.
- (C) Guaranteeing that the reputation of the person presenting an argument is beyond question.
- (D) Distracting attention away from the core reasoning and evidence of the main argument.
- (E) Denying a claim by attacking the person making it.
- (F) Representing significant obstacles to rational discourse.

50. Please identify the fallacies according to the passage: (簡答, 2 分)

Jack: I think it is important to enforce minimum-wage legislation so that workers are not exploited.

Paul: Nonsense. You only say that because you just can't get a good job!

Which fallacy is committed in this conversation?

第參部分、非選擇題 (占 28 分)

說明：本部分共有二大題，請依各題指示作答。答案必須寫在「答題卷」標示題號之作答區內，作答時不必抄題。

一、中譯英 (占 8 分)

說明：依題號將以下中文句子譯成正確、通順、達意的英文。每題 4 分，共 8 分。

1. 隨著網路幾乎到處都可取得，許多人偏好玩線上遊戲勝於參加戶外活動。
2. 然而，世界衛生組織 (WHO) 將線上遊戲上癮視為一種會導致憂鬱症的心理疾病。

二、英文作文 (占 20 分)

說明：依提示寫一篇英文作文，文長至少 120 個單詞 (words)。

提示：現代人在用餐、旅遊或購物前，經常透過網路評論，如 Google、IG 等，來決定餐廳、景點或商品。請以此為題，寫一篇英文作文，文長至少 120 個單詞 (words)。第一段詳述這種做法的優缺點；第二段說明你是否會透過網路評論來做相關決定，並舉自己或親友的經驗為例，來支持你的想法。
